To make a PUSH GITHUB:

Step – 1:

Create a new folder (eg., push github) in your files

Step – 2:

Open the folder and copy the folder name.

And also copy new repository first three lines code.

Step -3:

Open COMMAND PROMPT and type cd then space and paste new folder url then paste new repository three lines.

Step –4:

Give git add . then paste another four lines.

```
Initialized empty Git repository in C:/Users/prava/Documents/push github/.git/

C:\Users\prava\Documents\push github>git add README.md

C:\Users\prava\Documents\push github>git add .

C:\Users\prava\Documents\push github>git commit -m "first commit"
Author identity unknown

*** Please tell me who you are.

Run

  git config --global user.email "you@example.com"
  git config --global user.name "Your Name"

to set your account's default identity.
Omit --global to set the identity only in this repository.

fatal: unable to auto-detect email address (got 'prava@Pravallika.(none)')

C:\Users\prava\Documents\push github>git branch -M main

C:\Users\prava\Documents\push github>git remote add origin https://github.com/Padaladeepthipravallika/SE.git

C:\Users\prava\Documents\push github>git push -u origin main
error: src refspec main does not match any
error: failed to push some refs to 'https://github.com/Padaladeepthipravallika/SE.git'

C:\Users\prava\Documents\push github>
```

Step – 5:

Check files push github.
